Who is Avira?

Avira GmbH is a leading global provider of IT security solutions for professional and private use. With over twenty years of experience, the company is one of the pioneers in this field. As a founder member of the “IT Security made in Germany” association (ITSMIG e.V.), Avira has guaranteed that it will only provide IT security products that leave no room for data espionage.

The German IT security expert has its headquarters in Tettngang on Lake Constance and maintains several offices throughout the world. Avira employs around 400 people and its free Avira AntiVir Personal antivirus protection represents a significant contribution towards security and is used by over 100 million private users.

The domestic and international clientele is formed by well known companies listed on the stock exchange, many small and medium-sized companies, as well as educational establishments and government authorities. Apart from protecting the virtual environment, Avira promotes the Auerbach Foundation for greater security in the real world. The Auerbach Foundation supports charitable and social projects, as well as art, culture and science.

What makes Avira unique?

Avira has signed up to the “IT Security made in Germany” initiative.

We are committed to:

- Exclusively providing IT security solutions that contain no hidden access for third parties
- Producing products that do not allow crypto keys, parts of keys or access IDs to be transmitted
- Eliminating vulnerabilities or by-passes for access control systems as soon as possible once these are detected.

For more information see:
