

## Extreme Reliability™ For Windows And Unix Servers

Your business relies on servers to be running securely at all times. The last thing you want is unexpected downtime due to malware. Life is too short to spend ridding drives of viruses or carrying out time-consuming file system repairs. Free yourself from threats spreading onto your network from the internet by investing in Avira AntiVir Server.

Whether you need to protect a single central fileserver, or a mix of Windows or Unix servers across multiple sites, Avira takes care of it, reliably and efficiently.

Avira Server uses minimum memory and processing power, scans files and archives fast in real-time, plus updates itself automatically to guarantee total protection. The powerful Avira Security Management Center is easy to configure, allowing you to troubleshoot, scan or repair any connected server right from your desktop.

## Why Choose Avira AntiVir Server?

---

### Extreme Reliability™

---

#### One solution for all your Windows and UNIX servers

Truly integrated, cross-platform virus and malware protection.

#### High performance protection

Powerful proprietary antivirus technology that consistently wins top awards for detection and performance.

#### New dangers neutralised fast

Our in-house virus lab works around the clock to prevent the latest threats.

#### Always on the hunt

Monitors every file access in real-time, even archives and offline VMWare images.

#### Fast updates that don't hog bandwidth or hold up workflow

The industry's most compact program updates and virus pattern database files automatically update via the Internet or through the network without system interruption.

#### Rocket-speed simultaneous scanning of multiple files

Using filter functions, file caching and multi-threaded design.

#### Runs in 32 bit mode

Under Microsoft Windows Server 2003 and 2008, x86 & x64 Edition and also 32 & 64 bit Linux systems – still gives you on-access scanning (Unix only).

### Easy To Configure And Manage

---

#### Stay in control

Administer your whole network from one place using the Avira Security Management Center. Comprehensive notification and reporting functions are built in, integrated scheduler lets you automate routine tasks like updates when it's most convenient.

#### Simple, intuitive new interface

Start actions like scans and test runs directly from Avira Security Management Center.

#### Fast initial set up

Use the configuration Wizard for standard installation defaults (Windows only).

#### Easily tweak security levels

For example, you can select archive file types to check, plus adjust the recursion depth when dealing with archives or scanning runtime-packed files.

#### Give access only to those you trust

Password protect individual server setups against tampering.

#### Safely isolate infected and suspicious files

Using Quarantine Management under Windows.

#### Excellent interaction with Unix systems

For example, send SNMP traps for security-related processes, trigger automatic product updates via the Avira Security Management Center, now supports package management from RPM.

### Preserves Your IT Budget

#### Extremely low administration overhead

“Set and forget” automated workflows, everything on every server managed from one single point.

#### Intuitive operation

Saves you time, effort and money. No need for expensive training or technical education.

#### All inclusive

Free updates, free upgrades and free Gold Support included with every license during update period.

#### Transparent licensing

No hidden costs or non-inclusive essential extras.

#### Won't stress your systems

Our fast, resource-saving scanning technology reduces the load on servers, networks and storage drives, so they could last longer.

#### Change platforms for free

Switch to a new or alternative supported operating system and your Avira license moves too, at no extra cost.

### Sets Your System Administrators Free

#### No worries, whatever your network users do

Detects and prevents infection from known viruses, worms and Trojans.

#### Keeps your computers, strictly yours

Blocks unknown assailants from taking over your network. AntiRootkit catches even the most evil malware hiding deep in your server drives.

#### Stay unconcerned about the unknown

Catches and blocks even new and unidentified viruses, because Avira ProActiv recognises them by how they act, AHeAD-Tech-nology halts unknown code that looks suspicious.

## System Requirements

<b>Windows:</b>	Windows Server 2003 and 2003/x64 Edition SP1; Windows Server 2003 with current Terminal Services SP4 SR1; Windows Server 2008 (WebServer-, Standard-, Datacenter- and Enterprise-Edition); Windows Server 2008 R2 (Standard Edition, Enterprise Edition, Datacenter Edition and Foundation Edition) – only 64 Bit; Core Setup Support; 32 Bit and 64 Bit Edition; Citrix MetaFrame (Presentation Server up to and including 4.x)
<b>RAM:</b>	512 MB for Windows Server 2003. 1024 MB for Windows Server 2008 or Windows Server 2008 R2
<b>HDD:</b>	100 MB + quarantine. For the installation: 150 MB (temporary)
<b>Computer:</b>	Pentium with at least 266 MHz
<b>Unix:</b>	Red Hat Enterprise Linux 4, 5; Novell SUSE Linux Enterprise Server 9, 10-10.2, 11 (SLES); Novell Open Enterprise Server 1, 2; Debian GNU/Linux 4, 5 (Stable); Ubuntu Server Edition 8, 9; Sun Solaris 10 (SPARC)
<b>RAM:</b>	192 MB RAM
<b>HDD:</b>	100 MB plus 20 MB temporary memory on the hard disk
<b>Notes:</b>	Use under 64 bit Linux: Please use the required 32 bit libraries. Administration through the SMC: Please consider that the libstdc++so.5 is required for the SMC agent. Information regarding the lifecycle of the Avira products and a corresponding overview can be obtained from: <a href="http://www.avira.com/en/support/product_lifecycle.html">http://www.avira.com/en/support/product_lifecycle.html</a>
<b>Linux:</b>	For the installation of AVGuard under Unix, the external kernel module Dazuko 3.0 is required. Further information can be obtained from: <a href="http://www.dazuko.org">www.dazuko.org</a>
<b>Licensing:</b>	One license for all supported platforms. Licensing per protected computer. License periods: 1 year or 3 years. <b>Includes:</b> Free updates and upgrades during the license period. Free platform change. Software and documentation downloads. Avira Gold Support
<b>Optional:</b>	Platinum Support: 24 x 7 support by telephone/email (depends on order value)
